Subject: 26Ghz Regulations :)  
To: ham-policy@ucsd.edu

Well, not having looked into this in huge detail, let me direct you to Rules 90.101 and 103. They permit "any person engaged in a commercial, industrial, scientific, educational or local government activity" to be eligible for licenses in the Radiolocation Service, which includes the 24.05-24.25 GHz band. The next higher band is 33.4-36. Are you sure your device is 26 GHz?

Radio location Service is for radio methods of determining speed, direction, distance etc. except for navigation.

Police are automatically eligible through different rule provisions.

Disclaimer: I'm not a lawyer, but I've seen  
one on TV.

Virginia is not one of the states with scanner laws as  
listed in the Listener's Lawbook.

: The VOA mostly uses remote xmtr sites close to their target countries.

I wonder where the VOA antennas located between Dayton and Cincinnati,  
Ohio are pointed?
